# Data Automation For Manufacturing

**Struggling with manual processes, scattered data, and delayed decisions?**

Our data automation platform transforms these challenges into opportunities—streamline operations, enhance productivity, and drive innovation in your factory. Discover how we can help you stay ahead.

**Benefit**

  
**40%**  
Data Efficiency

  
**30%**  
Operation Efficiency

  
**1,000** Hrs./yr  
Time Saving

## Data Management Platform

### Data Ingestion

Connect data from variety resource

E-Form

File system

Machine connectivity

System connectivity

### Data Management

Build seamless integration into centralized database

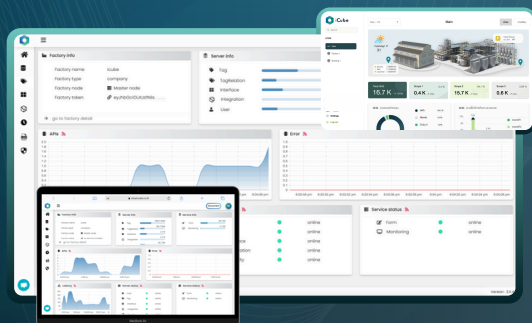

### Data Utilization

Automate with enterprise tools

Analytics & Visualization

AI & ML Application

Digital Twins & AR/VR

## Key Features

### • Multiple Source Integration - OT/IT

Seamless connectivity with machine and system

### • Data Processing Automation

Simplify your business logic with our solutions

### • Low Code Platform

Plug and play solution for citizen developers

### • AI / ML Intelligence

Analytic data model with global cloud service

## Digital Factory Ecosystems

### Operation Data

- E-Form
- File System
- Machine connectivity
- System connectivity

### Service Data

- RM Warehouse
- Production Planning
- Production Control
- Quality Management
- Maintenance Management
- Energy Management
- Financial and Account
- Strategic planning
- Sustainability
